

INDUSTRY EXPERIENCE

Associate, OnPoint Analytics, Inc., 2012 – Present:

Dawna Lewski is an Associate at OnPoint Analytics. She performs complex economic and statistical analysis in order to support expert testimony in a myriad of cases. Dawna employs her significant SAS and Stata programming skills for quantitative analysis, and has expertise creating and working with large datasets. She specializes in antitrust litigation, economic damages and intellectual property, and has experience in several industries including agriculture, technology, pharmaceuticals, transportation, consumer retail, energy, and real estate. Dawna's experience ranges from calculating antitrust damages in the multi-billion dollar range, to determining if a pharmaceutical product has achieved commercial success, to evaluating the amount of interest owed in the case of inverse condemnation. In cases where there is no well-researched method of analysis or calculation available, she has proficiency in creating innovative solutions when confronted with incomplete information or complex scenarios. Prior to her employment at OnPoint, Dawna studied abroad at the Meiji Gakuin University in Japan and explored topics in Finance and Public Policy as a graduate student.
